**Harmony Architecture**

**Creating healthy, harmonious & smart work spaces that teams love**

## Is your working environment costing or making you money?

Many work environments are outdated or rigid, and it's not a coincidence that the more creative - and profitable - organisations shun away from traditional style of workplace.

Workspace design improves wellness and helps to build a connected culture, both of which increases productivity and boost profits.

Better designed, harmonious workplace environments stimulate all five senses in the hearts, minds and souls of people who work there, so that businesses can retain, energise and grow both staff and profits.

Harmony Architecture is reknowned for our purposeful designs that work with nature, emphasise colour and light and human-centric spaces to enhance your vision and a sustainable quality of working.

**Following our 4 principles in designing work spaces, we promise to design a harmonious environment that will:**

- Uplift people's energy and wellness
- Build a positive and connected culture, and
- Increase creativity and productivity

**Concept | Nature | 9 Zones | Comfort & Aesthetics**

## What our clients have to say:

"Christina is passionate about sustainability, is very knowledgeable and always strives to create harmony in her designs and executions. She is also great at meeting client needs and always strives to deliver the best solution within budgetary constraints while upholding sustainability principles at all times."

- Diana Khabbaz, TAFE NSW

"The colour scheme is fantastic and continues to receive constant positive feedback from our visitors, as does Christina's overhead objects to define spaces and create visual interest."

- Deborah, CEO of Customware

## About Christina:

As an architect and a director of Melinz Kim & Associates Architects, I have supervised nearly 1000 projects over 30 years, ranging from \$300,000 to \$10 million for large government and commercial organisations, retreats, community centres and temples as well as a multitude of residential projects.

## We've worked with:

*"We shape our buildings, thereafter they shape us." - Winston Churchill*

## TALK TO US

About how your workspace can become more productive:

1. Book a free discovery session.
2. Initial consultation by phone or on site.
3. Engage us for a pre-design session to assess your space: design brief and conceptual design
